

It is hereby certified that the framing of the Photovoltaic Module with Solrif® conducted by:

SoliTek Cells UAB, Vilnius, Lithuania

has been audited and complies with the quality guidelines of Ernst Schweizer AG. If the processes are adhered to, it is ensured in the long term that the PV-module as a «large area roof tile» is watertight and suitable for its intended use (*). **SoliTek Cells UAB** is responsible for the application of the processes in its day-to-day production and is required to take appropriate QA-measures.

**A correct framing ensures that the PV modules are rainproof (comparable to roof tiles).
A professional roof construction according to local roofing guidelines, just like a tiled roof, ensures that the roof is 100% waterproof and will not be damaged in the long run by moisture (condensation or water overflow).*
